Stakeholder Analysis

Project Title

AI-Powered Credit Risk Analytics & Loan Default Prediction Platform

Overview

The success of a credit risk analytics solution depends on understanding the needs and expectations of stakeholders involved in the lending process. This project supports multiple business functions by providing data-driven insights for risk assessment, loan approval, portfolio management, and strategic decision-making.

Key Stakeholders

Stakeholder	Role	Key Objective
Executive Management	Strategic decision makers	Improve profitability and portfolio performance
Credit Risk Team	Risk assessment specialists	Identify and reduce default risk
Loan Officers	Loan approval decision makers	Make faster and more accurate lending decisions
Finance Department	Financial performance monitoring	Reduce losses and improve returns
Compliance Team	Regulatory oversight	Ensure fair and transparent lending practices
Portfolio Management Team	Portfolio monitoring	Optimize portfolio quality and risk exposure
Collections Team	Recovery management	Improve recovery rates and manage delinquent accounts
Analytics Team	Solution development	Build models, dashboards, and insights
Customers	Loan applicants	Receive fair and timely credit decisions

Stakeholder Expectations

Executive Management

- Reduce credit losses
- Improve profitability
- Monitor portfolio health
- Support business growth

Credit Risk Team

- Identify high-risk borrowers
- Improve risk assessment accuracy
- Monitor default trends
- Support lending decisions

Loan Officers

- Access risk scores and recommendations
- Reduce manual evaluation effort
- Improve approval consistency

Finance Department

- Monitor portfolio profitability
- Estimate financial risk exposure
- Reduce loan losses

Compliance Team

- Ensure regulatory compliance
- Maintain transparency in lending decisions
- Support explainable AI practices

Portfolio Management Team

- Monitor portfolio performance
- Identify high-risk segments
- Optimize risk-adjusted returns

Collections Team

- Prioritize recovery efforts
- Identify potential delinquent borrowers early
- Improve collection efficiency

Analytics Team

- Develop predictive models
- Deliver actionable insights

- Maintain data quality

Customers

- Receive fair evaluations
- Obtain faster loan decisions
- Experience transparent lending processes

Stakeholder Power-Interest Matrix

High Power, High Interest (Manage Closely)

- Executive Management
- Credit Risk Team
- Loan Officers
- Analytics Team

High Power, Medium Interest (Keep Satisfied)

- Finance Department
- Compliance Team

Medium Power, High Interest (Keep Informed)

- Portfolio Management Team
- Customers

Medium Power, Medium Interest (Monitor)

- Collections Team

Business Value to Stakeholders

The Credit Risk Analytics Platform provides stakeholders with:

- Improved risk visibility
- Data-driven lending decisions
- Better portfolio monitoring
- Reduced default risk
- Increased operational efficiency
- Explainable and transparent risk assessments

By aligning analytical outputs with stakeholder needs, the project supports more effective credit risk management, improved profitability, and enhanced customer experience.
